

Power Station Maintenance Operator

Job Description

We have an exciting new vacancy within our Power Station as we are looking for our next Maintenance Operator.

Reporting to the Power Maintenance Engineer, you will be responsible for ensuring the smooth and continued running of the plant. You will support the Power and Hydro Department by carrying out reactive and Planned Preventative Maintenance tasks. You will have a proactive approach to upgrading/improving plant and machinery. You will be able to complete all requirements in a professional, timely, and efficient manner.

About Us

Established in 1929, ALVANCE British Aluminium, part of the GFG Alliance, owns and operates the last remaining aluminium production plant (smelter) in the UK and a connected hydropower electricity generation station located on the slopes of Ben Nevis, Britain's highest mountain. A combination of renewable energy sources makes this site one of the greenest metal production plants in the country.

Working with Us

We work collaboratively with high energy and ambition to develop sustainable growth plans for our business, our future and our careers.

We are committed to uncompromising levels of safety, strong customer-centricity and diversity. Our people are our greatest asset.

If your true passion in life is to help create a better world through the work that you do, we would encourage you to think about ALVANCE British Aluminium. You will have the opportunity to thrive, make a difference and leave a legacy to both industry and society.

Key Responsibilities

- Ensure Preventative Maintenance is carried out on plant equipment as required in a safe and timely manner.
- Diagnose and fault-find equipment failures.
- Carry out tasks in accordance with all company policies and procedures.
- Work in and maintain a working environment with a high standard of housekeeping.
- Report and assist in the analysis of incidents or potential hazards.

ALVANCE

- Ability to follow written isolation procedures involving multiple points of isolation to control hazardous energy.
- Work, Test and Fault Find on High Voltage and Low Voltage equipment.
- Role includes participation in the Power Station call-out rota for Lochaber.

Who are we looking for?

- Qualified Electrician, Level 3 qualified or equivalent.
- HV Authorised or willingness to attain HV Authorisation up to 33KV.
- Willingness to be trained to cover the Power Plant Controller (*PPC*) role for a short term.

Hours of Work

- Monday - Friday (*Friday finish at 13:00*)

We can offer you the opportunity to be part of a strong and talented team, taking part in rewarding work, with supported learning and development, along with an excellent work-life balance.

For your commitment, drive and outstanding performance, you will be rewarded with:

- Competitive Salary
- All specialised training provided
- Bonus Scheme
- Company pension contribution from 6% up to 9%
- AVIVA Life Assurance (*6 times the salary*)
- BHSF Cash Health Care Plan
- On-site gym and access to a variety of Employee wellness initiatives
- Employee Assistance Programme
- Education Support Grant, £1000 for each child in university paid annually
- Cycle to Work Scheme
- Employee Reward and recognition programme
- Employee Discounts – Inclusive *rewards (Salary sacrifice scheme, discounts, cashback)*
- Half-day Fridays

This role does not provide visa sponsorship or a relocation package.

Closing date for this position is Monday 14th September
